## 01 SUMMARY

Senior Front-End and Full-Stack Developer with over nine years of experience architecting, building, and shipping high-performance, high-traffic web systems. Committed to component-driven architecture, flawless UI/UX execution, and rendering budgets spent where they actually matter. Deep expertise across the modern JavaScript ecosystem — with a proven record designing open-source UI libraries, enterprise design systems, and interactive Three.js / WebGL applications that hold their shape at scale.

## 02 TECHNICAL EXPERTISE

### ■ VUE / NUXT ECOSYSTEM

Vue.js 3

Nuxt 3 / Nitro

Pinia

VueUse

Raya UI

Inertia.js

### ■ 3D & CREATIVE WEB

Three.js / R3F

WebGL

GLSL Shaders

Parametric Modeling

GSAP

### ■ BACKEND & APIS

Node.js

Python / FastAPI

GraphQL / Apollo

REST

Microservices

### ■ REACT / NEXT ECOSYSTEM

Next.js App Router

React Server Components

TypeScript

Zustand / Redux

### ■ ARCHITECTURE & TOOLS

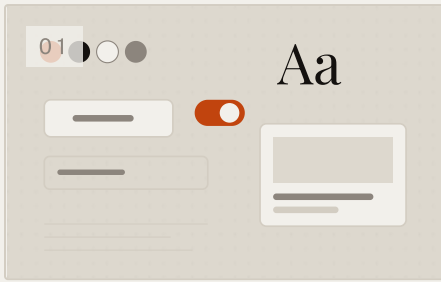

Tailwind CSS

SSR / SSG

CI/CD

Performance Budgets

## 03 SELECTED WORK

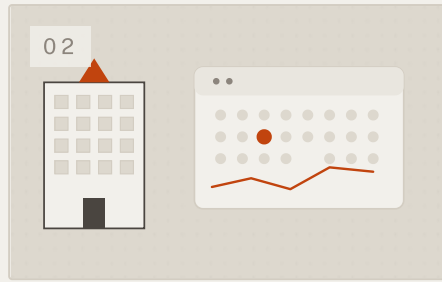

### Raya UI

VUE.JS · NUXT · TAILWIND CSS

Open-source, tokenised design system built to stay coherent across 40 product teams.

[raya-ui.com](https://raya-ui.com)

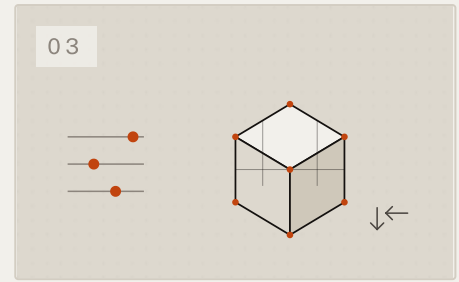

### Hotelyar

VUE.JS · NUXT · SSR

Enterprise reservation platform engineered to route 1.2M queries/sec at low TTFB.

[hotelyar.com](https://hotelyar.com)

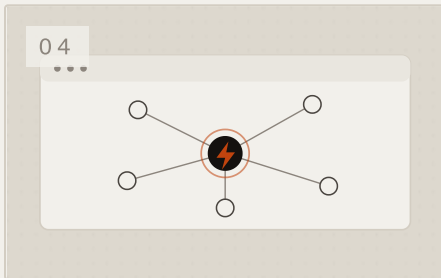

### Woodcoder

VUE.JS · THREE.JS · WEBGL

Live parametric 3D furniture configurator holding 60fps on integrated GPUs.

[woodcoder.com](https://woodcoder.com)

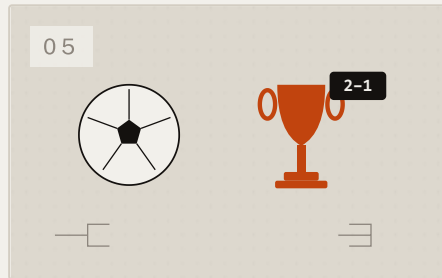

### Rizo

NEXT.JS · SERVER COMPONENTS

Edge-deployed platform on React Server Components for maximum speed & SEO.

[rizo.top](https://rizo.top)

### Tricup — World Cup 2026

REACT.JS · TAILWIND CSS

Live coverage hub with an interactive match prediction & scoring system.

[tricup.ir](https://tricup.ir)

### TinyHub

NEXT.JS · NODE.JS · MICRO-TOOLS

Developer productivity suite — JSON formatter, live syntax highlighter & more.

[tinyhub.ir](https://tinyhub.ir)

## 04 PROFESSIONAL EXPERIENCE

### Senior Frontend Developer

Jan 2024 — Present

Arnika Mehr Kish

- Architecting and leading front-end development of high-traffic enterprise platforms including Hotelyar.com and Woodcoder.com.
- Pioneering interactive 3D web experiences with WebGL and Three.js for parametric furniture configurators.
- Converting complex Figma prototypes into fast, production-grade apps with Nuxt.js and Tailwind CSS.
- Driving deep performance work — code splitting, SSR/SSG, asset caching — and GSAP-driven UI animation.

## ● Frontend Web Developer

Nov 2020 — Oct 2023

### Dewzilla

- Built, scaled, and maintained responsive enterprise web applications across the Vue.js and Nuxt.js ecosystem.
- Engineered complex state management with Pinia and integrated backend microservices via RESTful APIs.
- Developed a scalable custom UI component system with Tailwind CSS and Vuetify.

## ● Frontend Developer

May 2017 — Jan 2020

### GSI Telecom

- Built cross-browser compatible UIs for enterprise telecom management platforms using Vue.js and Bootstrap.
- Modernized legacy HTML/CSS into current structures, materially improving load speed and accessibility.

---

*"Load-bearing type, honest motion, and a rendering budget spent where the eye actually lands."*
